CEDAR GROVE CHURCH CAMPUS PLAN

Livermore, CA
Landscape Plan, 2006
Client: Cedar Grove Community Church

The Cedar Grove Church Campus Plan called for phased development of community buildings, child care facilities, administration buildings and a 19,250 square foot church to be constructed on an 14 acre site in Livermore, CA. Bruce Jett Associates role was to design landscaping to seamlessly blend the campus with its award winning vineyard neighbors in South Livermore Valley's renowned wine growing region. Project entrances and roads were created to conform with the rural character of South Livermore, borrowing from the natural stone and wood features found throughout the valley. Buildings were appropriately framed and screened from view, the site perimeter carefully planted to minimize impacts of adjacent grape vines, and interior courtyards designed to fit several programmatic requirements; the largest of which was designed for flexible baptistery, wedding and large and small group ceremonies.
